

Dual Drive IPA Upgrade Kit

- PROVIDES PARALLEL DUAL REDUNDANCY - If a module should fail in the IPA you are still on the air.
- SIGNIFICANT AM NOISE IMPROVEMENT - Using the dual modules, you can measure improvements in both synchronous and non-synchronous AM noise.
- ELIMINATES COLD START PROBLEMS - Using two modules combined isolates the IPA from the PA Grid at warm up.
- COST EFFECTIVENESS - Greatly reduces the cost of repairs in the unlikely event of module failure.
- MODULES ARE FIELD REPAIRABLE - Modules can be repaired in the field using common parts.
- IMPROVED STEREO AND SCA PERFORMANCE - Better bandwidth, and AM noise performance improves FM stereo and SCA performance.
- EASY INSTALLATION - Customer can install the IPA upgrade kit. Kit includes full installation and operation instructions.
